TECHNICAL SKILLS

Healthcare IT: HL7, FHIR, Mirth Connect, EMR Interfacing & Integration (Epic, Cerner, Meditech, eCW)

Programming/Data: Ruby, Python, JavaScript, Java, C/C++, SQL (PostgreSQL, MySQL), HTML/CSS, XML, JSON

Frameworks: Ruby on Rails, React, Streamlit, FastAPI, SQLAlchemy, Pandas, NumPy, PyTorch, JUnit, UnitTest

Tools/OS: Linux, Docker, VMware, Ansible, Git/GitHub, Bash Scripting, Jira, AWS (EC2), Maven, Conda

EXPERIENCE

Software Integration Engineer

October 2025 - Present

STERIS

Hauppauge, NY

- Integrate, test and deploy enterprise healthcare software products and features within hospital enterprise networks, including configuring virtualized solutions and consulting on complex IT environments.
- Manage full-lifecycle software integration projects, collaborating directly with hospital IT teams, internal stakeholders, and third-party vendors to ensure seamless data exchange and application functionality.
- Configure and optimize end-to-end clinical data pipelines, routing inbound EMR data to a central database and downstream OR devices, while orchestrating outbound exports of captured media back to hospital EMRs.
- Manage high-stakes EMR cutovers and system go-lives, providing continuous monitoring and tier-3 technical support across multiple customer facilities to ensure zero disruption to clinical operations.
- Designed and developed a RESTful API for OR medical devices, integrating hardware endpoints into the core application to enable seamless centralized, remote device management.
- Engineered internal tools using Ruby and Ansible to automate application OVA customer configurations and OR medical device provisioning, reducing manual setup times by 70%.

Software Application Developer/Analyst

May 2016 - October 2025

East End Hand Surgery

Port Jefferson, NY

- Engineered custom Python-based graphical user interfaces (GUIs) integrated with proprietary EMR systems to automate clinical workflows, saving healthcare providers 14+ hours weekly.
- Translated complex clinical business requirements into robust technical solutions by integrating and building custom applications for niche operational bottlenecks that significantly improved clinic throughput.
- Managed 2+ TB of sensitive patient records, ensuring data integrity, security, and adherence to HIPAA compliance through robust backup protocols and data management best practices.
- Authored comprehensive technical documentation and system configurations for all custom-built software, and led hands-on training sessions to ensure rapid and accurate end-user adoption.
- Served as the primary technical liaison between the clinical staff, EMR provider, and third-party vendors, proactively troubleshooting issues, coordinating system updates, and championing operational efficiency.
- Led the successful reorganization and modernization of the company's digital file structure, including the migration to an optimized, centralized storage solution, which reduced data storage and retrieval times by 50%.

Machine Learning Specialist - LLM Training & Debugging

April 2024 - October 2025

Data Annotation Tech

New York, NY

- Debug and optimize code to effectively train and enhance large language model (LLM) responses.

Software Engineering & Data Science Fellow

July 2024 - May 2025

CUNY Tech Prep

New York, NY

- Selected for a competitive fellowship, applying SDLC principles to develop full-stack solutions and optimizing machine learning models via data engineering techniques (EDA, predictive modeling, & statistical evaluation).

PROJECTS

C-Sphere | [GitHub Repository](#)

May 2025

- Co-developed a full-stack web app and Chrome extension to summarize, organize, and search user bookmarks.
- Engineered a RAG backend pipeline combining content summarization, semantic vector search, and embedding-based storage in PostgreSQL for optimized data storage and intelligent content querying.

Breathe NYC | [GitHub Repository](#) | [Live Demo](#)

September 2024

- Developed a web application using NYC OpenData public datasets to visualize and predict seasonal AQI trends across NYC neighborhoods using a linear regression ML pipeline that achieved 97% accuracy.

MindfulNet AI | [GitHub Repository](#) | [Live Demo](#)

May 2024

- Implemented a full-stack application utilizing a custom-built backend Random Forest machine learning model in Java to predict social media addiction with 98% accuracy and deliver personalized habit recommendations.

DropLock PDF | [GitHub Repository](#) | [Download Link](#)

July 2023

- Developed a Python-based Graphical User Interface (GUI) featuring drag-and-drop support for efficient, simultaneous encryption of multiple PDFs, enabling users to securely encrypt files in bulk and save time.

EDUCATION

Queens College, City University of New York

Master of Arts in Computer Science

May 2025

Bachelor of Arts in Computer Science

December 2024

Stony Brook University, State University of New York

Bachelor of Science in Biology

May 2019
